

Government Schemes Supporting Eco-Friendly Living (India)

Note: Scheme details, subsidy amounts, and deadlines change frequently. This is a sample starter document for pipeline testing — verify current figures on the official portal (linked per scheme) before using in a live deployment.

Rooftop Solar

PM Surya Ghar: Muft Bijli Yojana — a central scheme run through the Ministry of New & Renewable Energy (MNRE) promoting rooftop solar installation for residential households. - Aims to substantially expand India's cumulative rooftop solar capacity over the next few years. - Subsidies are typically disbursed directly to the homeowner's account after installation, inspection, and net-metering approval by the local electricity distribution company (DISCOM). - Applications and eligibility checks are done through the National Portal for Rooftop Solar. - Residents' Welfare Associations (RWAs) and Group Housing Societies can also apply for subsidies covering common-area solar installations, including shared EV charging infrastructure. - Official portal: pmsuryaghar.gov.in

Electric Vehicles

PM E-DRIVE Scheme — the current central incentive scheme supporting adoption of electric two-wheelers, three-wheelers, and other electric vehicle categories, succeeding the earlier FAME (Faster Adoption and Manufacturing of Electric Vehicles) scheme. - Provides purchase incentives that reduce the upfront cost of eligible electric vehicles. - Many state governments layer additional benefits on top of the central scheme, such as road tax waivers and registration fee exemptions — these vary by state, so check your state transport department's EV policy. - Charging infrastructure expansion is also supported under this and related state-level schemes.

Agriculture & Rural Solar

PM-KUSUM Scheme — supports solar-powered irrigation pumps and decentralized solar power generation for farmers, reducing dependence on diesel pumps and grid electricity for agricultural use.

PM JANMAN — focuses on solar electrification and basic infrastructure access for particularly vulnerable tribal groups (PVTGs) in remote regions.

Waste Management & Sanitation

Swachh Bharat Mission (Urban & Gramin) — India's national sanitation and solid waste management program, which underpins the municipal-level waste segregation and collection rules referenced in the recycling guidelines document. Cities and towns implement waste management infrastructure (segregation, composting, treatment plants) under this mission's framework.

How to Use This in the Agent

When a user asks about a scheme, the agent should: 1. Retrieve the relevant scheme description from this document. 2. Clearly state that subsidy amounts, deadlines, and eligibility criteria change and should be confirmed on the official portal before the user acts on them. 3. Where possible, point to the correct official portal/department rather than guessing at figures.
